*The mission of the Duquesne University Mylan School of Pharmacy and the Graduate School of Pharmaceutical Sciences is to educate and mentor students who advance the profession of pharmacy and pharmaceutical research to improve the health outcomes of patients and their communities.*

## ABOUT THE CENTER

**THE CENTER FOR PHARMACY SERVICES** is a community pharmacy located in the Hill District of Pittsburgh. One of five Academic Research Centers of the Mylan School of Pharmacy at Duquesne University, it offers state-of-the-art, comprehensive clinical pharmacy services. It is a first-in-the-nation, faculty-designed, university-operated community pharmacy and offers a unique educational training opportunity for Duquesne University student pharmacists.

Patient care is our primary focus. The goal of the Center is to improve access to medications and patient adherence, while enhancing medication safety and reducing overall health care expenditures. We seek to improve access to affordable medications by coordinating resources and delivery options, and to improve patient adherence through regular patient contact and prescriber collaboration. We are committed to working with community leaders and organizations, especially within the Hill District, to bring medication therapy management and pharmaceutical care to local residents.
