Connecting to DuqNet Wireless for Mac OSX

Prior to configuring your machine for DuqNet wireless you need to initialize your MultiPass account (credentials that you will be using for wireless). To do so, visit http://www.duq.edu/multipass and click the link for Setup MultiPass. Keep in mind that you will use this password that you've just created to setup your wireless connection.

Review Duquesne's Wireless Airspace Policy

http://www.sites.duq.edu/cts/policies/policy_duqnet_wireless.shtml

1. To connect to DuqNet, click on the wireless radio icon on the menu bar at the top of the screen and select “DuqNet”
Connecting to DuqNet Wireless for Mac OSX

2. Enter your MultiPass username and password and click “Join”. You should now be connected to DuqNet.

If you are still unable to connect, you may have to remove DuqNet from your preferred networks list before you connect to it. To do so, do the following:

1. Click on your Wireless icon on the menu bar at the top of the screen and select “Open Network Preferences”
2. Under the Network Preferences, make sure the “Wifi” tab is selected and click “Advanced”

3. Under the Advanced pane, make sure that the “Wifi” tab is selected. You may currently have DuqNet listed in the “Preferred Networks” box. Click on the “-” button below the Preferred Networks box to remove DuqNet.
4. Once DuqNet has been removed from your list, click “OK” and then click “Apply” on the Network Preferences screen to save your changes.

5. Finally, try connecting to DuqNet. If you still cannot connect, try restarting your computer.
