Pharmacy and Duquesne will provide the resident with every experience management programs, and point-of-care testing. A spectrum of services to their patients, such as: medication management (MTM), immunizations, clinical education, disease proficiency to operate an independent community pharmacy. In addition, the resident will gain the experience, understanding and skills, actively participate in selection of drug therapy, evaluate and manage the patient’s care setting to discharge. The resident/fellow shall refine overall clinical knowledge, and gain an understanding of drug inventory management and third-party payer systems. Additionally, the resident will be active in community outreach wellness programs, immunization clinics and health screenings. Clinical practices include customary medication dispensing and counseling, medication therapy management through Mirixa and Outcomes platforms, and medication synchronization. Hometown Pharmacy is also a member of the Pennsylvania Pharmacists Care Network whose mission is "to be a premiere professional network of pharmacists collaborating to optimize appropriate medication use to promote positive patient health outcomes.”

ACORx is a newly designed, closed-door retail model pharmacy dedicated to multi-medication adherence packaging. This advanced model was designed to complement Accountable Care Organizations and the shared goal of providing high quality coordinated care. Resident will exhibit clinical expertise through medication therapy management and ongoing medication reconciliation on a scheduled basis as well as during transitions of care. ACORx provides pharmacy services to support patients managing a wide array of chronic and often complicated conditions. Resident will contribute to and assist in the expansion of clinical services, collaboration with other healthcare professionals and overall advancement of the pharmacist’s role in improving patient outcomes.
DUQUESNE UNIVERSITY & UPMC MERCY-
PGY2 INTERNAL MEDICINE RESIDENCY
Program Director: Branden D. Nemecek, PharmD, BCPS
nemeckkb@duq.edu | 412.396.6370

This PGY2 residency program, offered by the Duquesne University School of Pharmacy and the University of Pittsburgh Medical Center (UPMC) – Mercy Hospital, prepares the resident to serve as a clinical specialist in internal medicine upon completion. UPMC Mercy is a 430-bed urban medical center in the heart of Pittsburgh right next to the Duquesne University campus. This experience will provide ample opportunities in the field of internal medicine along with quality research experiences and electives in various fields. The resident will accomplish their goals through working as part of integrative interdisciplinary teams through the hospital. The resident will participate as a preceptor with student pharmacists in advanced pharmacy practice experience (APPE) and will have enhanced opportunities to teach within the University as desired.

CENTER FOR PHARMACY CARE-
PGY1 COMMUNITY PHARMACY PRACTICE RESIDENCY
Program Director: Suzanne Higginbotham, PharmD, BCACP
higginbothams@duq.edu | 412.396.2053

This one year, post-PharmD residency prepares the resident with the clinical and professional skills necessary for a position as adjunct faculty, direct patient care opportunities in both ambulatory care and community practice, and advanced PGY2 programs. This will be accomplished by advanced clinical practice in the management of medication therapy for various ambulatory disease states in a variety of health care settings. The resident will be proficient in achieving optimal drug therapy outcomes as part of interdisciplinary health care teams, demonstrating competence in communication and in educating other health care professionals, patients, and the community on drug related topics. Residents will participate as preceptors with student pharmacists in advanced pharmacy practice experiences (APPE) courses from the Duquesne's School of Pharmacy. The resident will demonstrate professional maturity by developing a personal philosophy of practice, monitoring and evaluating their own performance and exhibiting commitment to profession. The resident will adhere to the University's Mission and Vision while supporting the School of Pharmacy in their strategic plan. A School of Pharmacy adjunct faculty member and clinical pharmacist serves as the residency program director, and is actively engaged in the provision of clinical services and scholarship related to community pharmacy practice. The resident should be creative, highly motivated, and dedicated to advancing the profession of pharmacy in the provision of pharmaceutical care services in community pharmacies/pharmacy practice. The School of Pharmacy is located in downtown Pittsburgh. In addition to clinical responsibilities, the resident will be involved in teaching efforts in didactic, ability based laboratory experiences, and advanced pharmacy practice experience teaching of Doctor of Pharmacy candidates. Residents will also gain experience in teaching and research methodologies. A research project of publishable and presentable quality is required.

GIANT EAGLE PHARMACY-
PGY1 COMMUNITY PRACTICE RESIDENCY
Program Director: Angelo Greco, PharmD
greco637@duq.edu | 412.396.2389

The purpose of the Duquesne School of Pharmacy/Giant Eagle Pharmacy PGY1 Community Practice Residency Program is to prepare the resident for a career as a leader in community pharmacy practice, in corporate pharmacy-level management, or as a school of pharmacy adjunct faculty member. The program is designed to utilize the strengths and resources of a chain drug store, a university, and a corporate pharmacy setting which all share a common mission to promote the health and wellness of the community and to enhance pharmacy practice. The community practice resident will gain clinical experiences in programs such as medication therapy management (MTM) services, diabetes education, vaccine administration, and health screenings. In addition, the resident will have the opportunity to learn about pharmacy practice administration on the corporate level and about the design and implementation of various clinical programs. The School of Pharmacy provides the resident experiences in developing teaching and research skills necessary to serve as an educator and preceptor of student pharmacists.

WALGREENS SPECIALTY PHARMACY-
PGY1 COMMUNITY PHARMACY PRACTICE RESIDENCY
Program Director: Pam Koerner, PharmD, BCPS
koerner@duq.edu | 412.396.6376

The goal of the Walgreens Specialty Pharmacy and the Duquesne School of Pharmacy PGY1 Community Pharmacy Practice Residency with a focus in Specialty Pharmacy is to provide pharmacy residents with opportunities to develop the fundamental skills necessary to excel in the specialty pharmacy environment. The residency program is based at Walgreens Specialty Pharmacy located in Carnegie, Pennsylvania. This one-year residency program offers a variety of patient care services to support patients who are managing chronic life-threatening or rare conditions, including cancer, Crohn’s disease, growth hormone disorders, multiple sclerosis, psoriasis, and rheumatoid arthritis, among others. The clinical pharmacists at this site work closely with health care professionals, patient care coordinators, insurance advocates and patients to meet the needs of the patient’s medication therapy. In addition, residents will gain insights on the pharmacy practice management issues that can affect the delivery of care for patients taking specialty medications.

The residency is offered in partnership with Duquesne’s School of Pharmacy. This partnership allows the resident the opportunity to also gain experiences in pharmacy level management, or as a school of pharmacy adjunct faculty or as a school of pharmacy adjunct faculty. As part of this residency program, the resident will be exposed to a variety of patient-centered practice experiences designed to develop their ability to implement pharmacist provided clinical pharmacy services and further enhance their disease state management knowledge.

Specifically, the resident will maintain an active presence at two specific PPCP office locations and offer such services as medication therapy management, transitions of care, medication information, and patient medication education. The resident will also provide remote clinical services for all of the PPCP locations including telephonic MTM and patient counseling, electronic chart reviews and clinical interventions, and other quality-driven projects as determined by the organization. The resident will be trained as a Certified Tobacco Treatment Specialist and will assist in leading group smoking cessation classes. Additionally, the resident will interact with members of the corporate PPCP team to develop and implement new patient care services. The resident will have academic responsibilities within the School of Pharmacy and will assist in precepting student pharmacists on advanced ambulatory practice rotations.

DELTA CARE RX-
PGY2 PAIN AND PALLIATIVE CARE RESIDENCY
Program Director: Mary Mihalyo, PharmD
mihalyo@duq.edu

This PGY2 residency program is a shared residency between Duquesne University and Delta Care Rx. Delta Care Rx is a privately held provider of hospice centered on demand clinical pharmacist services, pharmacy billing solutions, and electronic prescribing specifically tailored to the hospice industry. Pharmacists at Delta Care Rx provide medication therapy management (MTM) services to hospice prescribers, nurses, patients, and caregivers to provide evidence based clinical consultations.
