Bayer School Scholars Program
For Underrepresented Populations in Science

Interested in a career in science? Underrepresented populations have the chance to stand out among their peers with a four-year scholarship through Duquesne University’s Bayer School of Natural and Environmental Sciences.

The program accepts up to five highly qualified freshmen in the areas of chemistry and biochemistry, environmental science, biological sciences, forensics science and law, and physics.

Apply before January 5, 2018
For additional information visit: duq.edu/bayerschoolscholars

As a Bayer School Scholar, you will:
- Get experience working in a research lab as early as freshman year
- Participate in funded summer research experiences at Duquesne University and the Citizens Science Lab
- Be mentored by top professionals in your field, including Bayer School faculty
