

Summer Research Experiences in the **Chemical Sciences**

A Ten-Week Summer Program for Undergraduates at Duquesne University

May 26 - July 31, 2009

Attend one of the nation's only summer research programs enabling students to use supercomputers as a tool to solve chemistry problems in nanotechnology, homeland security, forensic science, pharmaceutical drug design and more!

Featuring:

- Ethics Forum
- Community Service
- Research Symposium
- Seminar Series
- Social Events

Stipends start at \$3,500, plus free housing and travel assistance.

Work with computer industry experts and world-renowned faculty from across the U.S.

Application Deadline: March 2, 2009
