

Global Health Undergraduate Minor/Graduate Concentration Course Approval Submission Form

Name of Course Instructor/Coordinator(s):

Department and School:

Course Title, Code and Number:

Level (indicate all that apply): Undergraduate Graduate

Offered (indicate all that apply): Fall Spring Summer Study abroad Other

Please indicate which of the following learning outcomes are identified within the course

Undergraduate minor

- Identify and define the landscape and importance of prevalent global health issues
- Develop a critical understanding of the interdisciplinary nature of global health
- Exhibit cultural awareness in interactions related to global health
- Engage with communities, either locally or globally, regarding their health issues.

Graduate concentration

- Integrate knowledge acquired across courses through an interdisciplinary lens.
- Demonstrate the ability to apply knowledge to situations related to global health.
- Employ skills to address various global health issues appropriate to their profession.
- Demonstrate cultural competency appropriate to the professional settings in which they engage.
- Navigate the changing environments of global health through adaptation and critical thinking.

How will the identified learning outcomes be assessed?

How does the course fulfill the 25% undergraduate or 40% graduate level of global health content (or how could it be adjusted for an individual student to achieve this level)?

Please submit a copy of the course syllabus along with this form electronically (word or pdf only) to bodoog@duq.edu
