

Pain and Neurodegenerative **SUMMER RESEARCH PROGRAMS**

May 23-July 29, 2022 | Pittsburgh, PA

Conduct valuable biomedical research in pain or neuroscience to help the clinical needs of patients and their caregivers.

Learn alongside Duquesne's faculty who are making an impact at the Pain Undergraduate Research Experience (PURE) and Neurodegenerative Undergraduate Research Experience (NURE) 10-week summer residency research programs.

All undergraduate students majoring in science or related majors, including those from various socioeconomic and/or diverse backgrounds, are encouraged to apply.

- Receive free on-campus housing close to Pittsburgh activities (VisitPittsburgh.com) and a **competitive stipend of \$4,400**
- Attend an integrated ethics course and professional development workshops
- Participate in monthly journal club and discussion sessions to review primary literature with faculty, students and clinicians
- Understand the personal and practical impacts of pain management from individuals living with chronic conditions

APPLY BY FEBRUARY 25, 2022

To apply or for more information visit duq.edu/PURE or duq.edu/NURE

All applicants must have completed an Introduction to Chemistry or Biology course and be in good-standing with their University/College.

A full on-campus summer 2022 experience is planned, however the program is subject to change and/or restrictions to adhere to Duquesne University's COVID-19 safety protocol.
