Scope of the Conference

Communicology is the science of human communication. One of the Human Science disciplines, it uses the logic based methods of semiotics and phenomenology to explicate human conscious experience and behavioral embodiment within global culture. Communicology is the study of human discourse in all of its semiotic and phenomenological manifestations of embodied consciousness and practice in the world of other people and their environment. The American and Continental traditions in Philosophy ground this approach to the study of communication.
