REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

To the Board of Directors
Duquesne University of the Holy Spirit

Opinion

We have audited the financial statements of Duquesne University of the Holy Spirit (the "University"), which comprise the statements of financial position as of June 30, 2024 and 2023, and the related statements of activities and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the University as of June 30, 2024 and 2023, and the changes in net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for opinion

We conducted our audits of the financial statements in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the University and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the University's ability to continue as a going concern for one year after the date the financial statements are issued.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material

misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the University's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

NOTE A - SIGNIFICANT ACCOUNTING POLICIES

Organization

Duquesne University of the Holy Spirit (the “University”) is a private, Catholic University, organized as a tax-exempt nonprofit corporation under the laws of the Commonwealth of Pennsylvania. The University was founded by the Holy Ghost Fathers and first opened its doors as the Pittsburgh Catholic College of the Holy Ghost in 1878. By 1911, the University was the first Catholic institution in Pennsylvania to achieve university status, at which time the name Duquesne University of the Holy Ghost was adopted. In 2002, the University changed its name to Duquesne University of the Holy Spirit and is the only Spiritan institution of higher education in the United States.

Located adjacent to the downtown area of the City of Pittsburgh, Pennsylvania, the University’s hilltop (“bluff”) campus is close in proximity to the City’s business and cultural center. The University has a 48-acre main-campus and is comprised of 10 schools with the most recent addition of the College of Osteopathic Medicine. Duquesne’s students come from every state and scores of countries across the world. The University’s principal sources of revenue include student tuition and fees, auxiliary revenues, grants, and gifts.

Basis of Presentation

The financial statements have been prepared on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”). Net assets, revenues, expenses, gains, and losses are classified based on the existence or absence of donor-imposed stipulations. Accordingly, net assets of the University and changes therein are classified and reported as follows:

- Without donor restrictions - Net assets that are not subject to donor-imposed stipulations.
- With donor restrictions - Net assets subject to donor-imposed stipulations that may or will be met either by actions of the University and/or the passage of time. Also included in this category are other net assets with donor restrictions which are subject to donor-imposed stipulations or by law that they be maintained in perpetuity by the University. Generally, the donors of these assets permit the University to use all or part of the income earned on related investments for general or specific purposes.

Taxes

The University has been determined to be exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code (“IRC”) of 1986. As a result, no provision for taxes has been made in the accompanying financial statements.

The University adopted guidance for uncertainty in income taxes, which provides criteria for the recognition and measurement of uncertain tax positions. This guidance requires that an uncertain tax position should be recognized only if it is “more likely than not” that the position is sustainable based on its technical merits. Recognizable tax positions should then be measured to determine the amount of benefit recognized in the financial statements. The University files U.S. federal, state, and local income tax returns, and no returns are currently under examination. The University continues to evaluate its tax positions pursuant to the principles of such guidance and has determined that there is no material impact on the University’s financial statements.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include all highly liquid investments with original maturities of less than three months. Cash equivalents are stated at cost, which approximates fair value.

Concentration of Credit Risk

The University maintains cash and cash equivalent balances with banking institutions and brokerage companies. At June 30, 2024, the amounts on deposit at the banking institutions and the amounts on deposit at the brokerage companies exceeded the amounts that would be covered by the Federal Deposit Insurance Corporation ("FDIC") and the Securities Investor Protection Corporation ("SIPC"), respectively. In management's opinion, the amounts in excess of FDIC and SIPC limits do not pose significant risk to the University.

Risks and Uncertainties

Investment securities are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in risks and values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of financial position.

Pledges Receivable

Pledges receivable from fund-raising campaigns are recorded by the University when the unconditional promise to give (pledge) is made and are recorded at fair value using a discount rate commensurate with the risks associated with the pledge.

The allowance for credit losses on pledges receivable is based upon management's judgment, including such factors as prior collection history and type of receivable. The University writes off receivables when they become uncollectible, with the expense presented as an offset to gift revenue, and payments subsequently received on such receivables are credited to the allowance for credit losses.

Property, Plant, and Equipment

Property, plant, and equipment are stated at cost at the date of acquisition or fair value at the date of donation in the case of gifts. Depreciation is computed on a straight-line basis over the estimated useful lives of the assets. The following table shows the estimated useful lives of property, plant, and equipment:

| | |
|------------------------------------|---------------|
| Land improvements | 10 years |
| Buildings | 40 years |
| Building improvements | 10 - 40 years |
| Furniture, equipment, and software | 5 - 15 years |

The University reviews its property, plant, and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. No impairment charges were recorded by the University in 2024 or 2023.

Deferred Revenues and Deposits

Deferred revenues and deposits represent revenues currently received for programs or activities to be conducted primarily in the next fiscal year, such as summer and fall tuition and fees and room and board. Also included in deferred revenues and deposits is deferred revenue related to sponsorship agreements and commitment deposits received from certain vendors, which will be recognized as income over the lives of the related agreements. In addition, included in deferred revenues are funds received related to certain refundable grants. These amounts will be recognized as income as the conditions are met in accordance with the underlying terms of the grants.

The activity and balances for deposits and deferred revenues from contracts with customers are shown in the following table (in thousands):

Liabilities Associated with Investments

For the fiscal year ended June 30, 2023, the University invested capital on behalf of a religious entity that shares the University's Catholic ministry and educational missions, reporting an equal asset and liability in the statements of financial position of \$5.0 million. The religious entity terminated this arrangement and withdrew the investment as of May 28, 2024.

Tuition and Fee Revenue

The University recognizes revenue from student tuition and fees within the fiscal year in which educational services are provided. Institutional aid, in the form of scholarships and grants-in-aid, includes amounts funded by endowments and gifts, and reduces the amount of revenue recognized.

Revenue for tuition and fees for all of the summer terms are recognized as performance obligations are met. Because the summer academic terms span two reporting periods, a portion of the revenue for the summer terms is included in deferred revenue at June 30, 2024 and 2023. Deferred revenues for the summer terms are shown in Note A Deferred Revenues and Deposits.

The following details the gross and net amounts of tuition and fees for fiscal years ended June 30, 2024 and 2023 (in thousands):

| | 2024 | 2023 |
|-------------------------|------------|------------|
| Tuition and fees | \$ 360,579 | \$ 344,288 |
| Less: institutional aid | (145,722) | (131,338) |
| Tuition and fees, net | \$ 214,857 | \$ 212,950 |

Auxiliary Services Revenue

Auxiliary services exist to furnish goods or services to students, faculty, staff, or incidentally to the general public. Fees charged for auxiliary services are directly related to, although not necessarily equal to, the cost of the goods or services provided.

Auxiliary services revenue includes activities for student housing and dining facilities, parking services, and other miscellaneous activities. Institutional aid specifically for defraying the cost of room and board reduces the amount of revenue recognized.

Revenues for auxiliary services are recognized as performance obligations are met over the academic term. Because the summer terms span two reporting periods, a portion of the revenue for the summer terms are included in deferred revenue at June 30, 2024 and 2023. Deferred revenues for the summer terms are shown in Note A Deferred Revenues and Deposits.

The following details the gross and net amounts of auxiliary services revenue for fiscal years ended June 30, 2024 and 2023 (in thousands):

| | 2024 | 2023 |
|----------------------------------|-----------|-----------|
| Auxiliary enterprises | \$ 48,920 | \$ 44,381 |
| Less auxiliary institutional aid | (4,766) | (8,304) |
| Auxiliary enterprises, net | \$ 44,154 | \$ 36,077 |

Gifts and Grants

The University reports gifts and grants of cash and other assets as net assets with donor restrictions if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires (i.e., when a stipulated time restriction ends or purpose restriction is accomplished), net assets with donor restrictions are reclassified to net assets without donor restrictions and reported in the statements of activities as net assets released from restrictions.

The University reports gifts of land, buildings, and equipment as net assets without donor restrictions, unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as net assets with donor restrictions. Absent explicit donor stipulations about how long those long-lived assets must be maintained, the University reports expirations of donor restrictions when donated assets are placed in service.

The University receives sponsored project funding from various governmental, corporate, and private organizations, which are recorded as grants and contracts revenue. The funding may represent a reciprocal transaction in exchange for an equivalent benefit in return, or it may be a nonreciprocal transaction in which the resources provided are for the benefit of the University, the funding organization's mission, or the public at large. Contracts are generally without donor restrictions.

Revenues from exchange transactions are recognized as performance obligations are satisfied, which in some cases are as related costs are incurred.

Revenues from non-exchange transactions (contributions) may be subject to conditions, in the form of both a barrier to entitlement and a refund of amounts paid (or a release from obligation to make future payments). Revenues from conditional non-exchange transactions are recognized when the barrier is satisfied.

Investments and Investment Income

In accordance with guidance on accounting for certain investments held by not-for-profit organizations, investments are recorded at fair value. A summary of the inputs used in valuing the University's investments as of June 30, 2024 and 2023 is included in Note B.

Interest income, unrealized gains and losses on investments, and realized gains and losses from the sale of investments are accounted for in the statements of activities in the net asset classification that holds the investments, except for income and gains and losses derived from investments of endowment and funds functioning as endowment, which are accounted for in the net asset classification designated by the donor or by law.

Federal Student Loan Program

The University administers and contributes a portion of the total funds available for various student loan programs, including Perkins, Nursing, Health Profession, and Nursing Faculty Loans. The loan programs are financed primarily by the U.S. government. Loans are made to qualified students and are reported as loans receivable, net in the statements of financial position. Upon termination of the programs, the amounts representing net government advances (federal loan funds), which are reflected as a liability of approximately \$6.6 million and \$7.0 million at June 30, 2024 and 2023, respectively, will be returned to the government.

Fair Value

The estimated fair value of all financial instruments has been determined using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret market data in developing fair value estimates. Accordingly, the estimates included herein are not necessarily indicative of amounts the University could realize in current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on estimated fair value amounts. All other financial instruments, other than investments as discussed above, are recorded at historical cost, which approximates fair value.

In determining fair value, the University uses various approaches, including Financial Accounting Standards Board ("FASB") Accounting Standards Codification 820, *Fair Value Measurements*, which establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing an asset based on market data obtained from sources independent of the organization. Unobservable inputs reflect an organization's estimates about the assumptions market participants would use in pricing an asset and are developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the observability of inputs as follows:

- Level 1 - Valuations based on quoted market prices in active markets for identical assets that the organization has the ability to access. As valuations are based on quoted market prices that are readily available in an active market, valuations of these products do not entail a significant degree of judgment;
- Level 2 - Valuations based on one or more quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly; and
- Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The University also reports under the FASB update for *Investments in Certain Entities that Calculate Net Asset Value ("NAV") per Share (or its Equivalent)*, which permits, as a practical expedient, the University to measure the fair value of an investment that is within the scope of the update on the basis of the NAV per share of the investment or its equivalent determined as of the University's fiscal year end. Under this approach, certain attributes for the investment, such as restrictions and transaction prices from principal-to-principal or brokered transactions, are not considered in measuring the fair value of an investment.

The availability of observable inputs can vary from instrument to instrument and is affected by a wide variety of factors, including, for example, the liquidity of markets and other characteristics particular to the transaction. To the extent that a valuation is based on models or inputs that are less observable in the market, the determination of fair value requires more judgment.

The University uses prices and inputs that are current as of the measurement date, which are obtained through multiple third-party custodians from independent pricing services.

Guarantees and Commitments

In the ordinary course of business, the University enters into contracts with third parties pursuant to which the third parties provide services on behalf of the University. In many of the contracts, the University agrees to indemnify the third-party service provider under certain circumstances. The terms of the indemnity vary from contract to contract, and the amount of the indemnification liability, if any, cannot be determined. The University also has minimum purchase requirements related to certain utility contracts that have been met annually through June 30, 2024.

Pursuant to its bylaws, the University provides indemnification to directors, officers, and, in some cases, employees and agents against certain liabilities incurred as a result of their service on behalf of or at the request of the University and also advance on behalf of covered individual costs incurred in defending against certain claims, if any, subject to written undertakings by each such individual to repay all amounts so advanced if it is ultimately determined that the individual is not entitled to indemnification.

Insurance Liabilities

The University is self-insured through an agreement with third-party providers to provide medical coverage for all full-time University employees. A liability for estimated incurred but unreported claims has been recorded in accounts payable and accrued expenses at June 30, 2024 and 2023, based upon a third-party evaluation of claims and management's analysis of past claims history. The third-party evaluation of claims includes assumptions and methods that were reviewed by University management.

The University is also self-insured for certain other activities, principally workers' compensation. Liabilities have been established based on third-party estimates using the University's historical loss experience. The self-insurance accrual is subject to periodic adjustment by the University based on actual loss experience factors.

Nonoperating Activities

Nonoperating activities include gifts and pledges related to endowments and earnings on funds functioning as endowments, bequests, annuity and loan activity restricted in perpetuity, return on investments less amounts distributed, and net periodic benefit costs other than service costs. They also include items such as costs associated with separation agreements and gains on the defeasance of bonds.

Recently Adopted Accounting Guidance

In June 2016, the FASB issued Accounting Standards Update ("ASU") 2016-13, Financial Instruments — Credit Losses (Topic 326): *Measurement of Credit Losses on Financial Instruments*. The ASU amended guidance on the measurement of all expected credit losses for financial instruments, including trade receivables, based on historical experience, current conditions, and reasonable and supportable forecasts. This amendment was adopted in 2024 and did not have a material impact on the financial statements.

The fair value of common, preferred, and foreign stocks and exchange-traded notes is valued using quoted market prices in active markets.

Mutual funds are open-ended Securities and Exchange Commission registered funds with daily quoted market prices. The mutual funds allow investors to sell their interests to the fund at the published daily quoted market prices, with no restrictions on redemptions.

Government securities, government agency securities, corporate fixed-income securities, and asset-backed mortgage securities, including residential mortgage-backed securities and commercial mortgage-backed securities, are valued based on multiple sources of information, which may include market data and/or quoted market prices from either markets that are not active or are for the same or similar assets in active markets.

Limited liability partnerships, hedge funds, private equity, etc., are partnerships created and administered by a general partner who invests either directly in a specified investment strategy or indirectly through other limited liability partnerships in so called "fund of funds." The underlying investments of these funds can be actively traded securities in the case of certain hedge fund strategies or illiquid and privately held equity investment, as in the case of private equity investments. The partnership documents outline the terms and conditions by which the general partner administers the partnership and its investments. Each limited partner owns a specified share of the partnership. These partnerships cannot be marketed to the public and are restricted, by regulation, to qualified investors. The underlying investments of these partnerships include many different types of investments, including interest rate swaps, commercial paper, foreign currency, private equity, short-term interest in common stock, and convertible bonds. These investments are carried at fair value as of June 30, 2024 and 2023, based on estimates developed by the management of the investment entities investing in the funds. These valuations include assumptions and methods that are reviewed by University management. The valuation of the partnership interest typically is performed at least quarterly by the general partner through unaudited statements and validated through annual audited financial statements. In certain partnerships, the readily available data on market values allows for monthly valuation of the partnership interest. As such, the fair value of these partnerships is measured using the NAV as calculated by the custodian.

Residential real estate trusts are measured at the fair market value assigned by a certified residential appraiser. The property is tested annually for impairment.

The University believes that the reported amount of its investments is a reasonable estimate of fair value as of June 30, 2024 and 2023. As the estimated value is subject to uncertainty, the reported value may differ from the value that would have been used had a ready market existed.

There has been no significant change in valuation techniques of investments during the year.

Interest, dividends, and realized and unrealized gains, net, are included as a component of both operating and nonoperating items.

Investment income (loss) for the years ended June 30, 2024 and 2023, exclusive of earnings on idle receipts, escrow funds and other deposits with trustees, consisted of the following (in thousands):

| Unrealized gains (losses) on marketable securities, net | 60,254 | (37,815) |
| Total | \$ 72,543 | \$ 48,777 |

The following table summarizes the investments valued at NAV by strategy type (in thousands):

| Description | 2024 | | 2023 | | Unfunded Commitment at June 30, 2024 | Redemption Terms | Redemption Notice Period |
|----------------|--------------------|------------|--------------------|------------|---|-------------------------|--------------------------------|

| Total | 34 | \$ 121,162 | 33 | \$ 147,851 | \$ 62,891 | | |

Investments held by the University may be subject to restrictions related to the initial investment that limit the University's ability to redeem capital from such investments during a specified period of time subsequent to the University's investment of capital in such funds, typically known as a lock-up period. Capital available for redemption after the lock-up period has expired may also be subject to limits, which restrict the available redemption period, and require prior written notice, potentially limiting the University's ability to respond quickly to changes in market conditions. As of June 30, 2024, there are six funds with a market value of \$11.8 million with lock-ups expiring in fiscal year 2024.

Private equity investments cannot be redeemed upon request. Instead, the nature of these investments is that distributions are received through the liquidation of the underlying assets of the fund. It is estimated that the underlying assets of these funds would be liquidated over approximately one to 12 years.

The University maintains a total return spending policy, which was 4.25% of the average fair market value of the previous 16 quarters ended December 31, 2022 and 2021, for the years ended June 30, 2024 and 2023, respectively. The University has adopted PA Trust Law Act 141, which requires a release of between 2% and 7%. Separating spending policy from investment policy permits asset allocation decisions to be made independently of the need for current income. The University's investment policy has a primary objective to achieve annualized total return, through appreciation and income, equal to or greater than the rate of inflation plus any spending and administrative expenses. This allows the University to maintain purchasing power of the investment pool. The assets are managed in a manner that will meet the primary investment objective, while attempting to limit volatility in the portfolio's market value, thereby limiting volatility in the year-to-year spending. The policy allows for a range of asset classes, including global equity and debt securities, real assets and alternative investments. The University includes its interest in perpetual trusts in endowment and funds functioning as endowment. Changes in the value of the endowment and funds functioning as endowment are included in the nonoperating section of the statements of activities along with the changes in mid and long-term working capital, value of annuities and loan funds restricted in perpetuity.

From time to time, the fair value of assets of individual donor-restricted endowment funds may fall below the level required to be maintained in perpetuity in accordance with the applicable donor gift document, creating an "underwater" endowment fund. For the fiscal year ending June 30, 2024, there were three endowment funds with initial gifts totaling \$5.1 million, compared to market values totaling \$5.0 million, for an underwater deficiency totaling \$0.1 million. For the fiscal year ending June 30, 2023, there were 19 endowment funds with initial gifts totaling \$8.1 million, compared to market values totaling \$7.6 million, for an underwater deficiency totaling \$0.5 million.

The University is one of 15 designated institutions of higher learning and other charitable organizations named as beneficiaries of The Dietrich Foundation (the "Foundation") created by William S. Dietrich II pursuant to an Amended and Restated Declaration of Trust dated August 23, 2011. The Foundation came into existence as a Pennsylvania charitable trust on October 6, 2011 and was granted exemption from Federal income tax under Section 501(c)(3) of the IRC, specifically as a Type I charitable supporting organization under Section 509(a)(3). The Foundation's primary mission is to provide ongoing and

(Dollars in thousands)

increasing financial support to a number of educational institutions, largely in the greater Pittsburgh area, including the University. The Foundation is governed by a board of nine trustees. Five of the trustees are Educational Institutions Trustees.

The Foundation is expected to make annual distributions that will be allocated among the pre-specified supporting organizations, which are divided into two primary groups: (a) six educational institutions, which collectively shall receive 90% of the annual distribution amount, and (b) nine other charitable organizations or component funds of such charitable organizations, which collectively shall receive 10% of the annual distribution amount. The University is included in the 90% group. As of June 30, 2024, the University's distribution share was 2.5%.

The distributions to the University have been recorded as contribution revenue with donor restrictions as received and held in an endowment fund restricted in perpetuity designated by Dietrich Foundation Endowment Fund. The endowed fund will be managed in accordance with the University's generally applicable investment and disbursement policies in effect for its other endowments restricted in perpetuity. Distributions made from the endowed fund will be used for the purpose authorized by the Foundation's trustees. Distributions of \$1.1 million and \$1.3 million were received in fiscal years 2024 and 2023, respectively.

As of June 30, 2024, the University's Board of Directors has designated pooled endowment funds in a separate escrow account in the amount of \$44.7 million as a teach out reserve in accordance with College of Osteopathic Medicine accreditation requirements. Furthermore, the reserve must be held for one year after the first class of students graduates, anticipated for May 2028. The reserve could then be released May 2029.

NOTE D - FINANCIAL ASSETS AND LIQUIDITY RESOURCES

As of June 30, 2024 and 2023, financial assets and liquidity resources available within one year for general expenditure, such as operating expenses, scheduled principal payments on debt, and capital construction not financed with debt, were as follows (in thousands):

As part of the University's liquidity management, financial assets are structured to be available as general expenditures, liabilities, and other obligations come due. In addition, cash in excess of daily requirements is invested in short-term, cash-equivalent investments. To help manage unanticipated liquidity needs, the University has a committed line of credit, which could be drawn upon at any time. The line of credit expires September, 2025, and there are no outstanding draws on the facility. Additionally, the University has quasi-endowment and working capital investments of \$361 million, including \$44.7 million held as a teach out reserve in accordance with College of Osteopathic Medicine accreditation requirements. Although the University does not intend to spend from these investments other than the amounts authorized as part of its spending policy, amounts from these investments could be made available if necessary with Board of Directors approval. However, the quasi-endowment, donor-restricted endowment and working capital all contain investments with lock-up provisions that would reduce the total investments that could be made available within one year (see Note B for disclosure about investments).

NOTE E - RECEIVABLES

Accounts receivable at June 30, 2024 and 2023 consist of the following (in thousands):

| | 2024 | 2023 |

Fund-raising costs were \$3.4 million and \$2.6 million for the years ended June 30, 2024 and 2023, respectively.

Loans Receivable

The University makes uncollateralized loans to students based on financial need. Loans are funded through federal government loan programs or institutional resources. At June 30, 2024 and 2023, student loans represented 0.5% and 0.6% of total assets, respectively.

At June 30, 2024 and 2023, student loans consisted of the following (in thousands):

University Revenue Bonds (“Series A of 2014”) - In December 2014, the Authority issued \$39.2 million of revenue bonds to provide for a portion of (a) the advance refunding of the Authority’s outstanding University Revenue Bonds Series A of 2005, (b) the advance refunding of the Authority’s outstanding University Revenue Bonds Series B of 2005, (c) the advance refunding of the Authority’s outstanding Revenue Bonds Series A of 2007, and (d) to provide for bond issuance costs.

These bonds mature annually in principal ranging from \$1.0 million to \$3.8 million beginning in fiscal 2015 and ending in fiscal 2033.

Approximately \$0.3 million of costs related to the issuance of these bonds has been deferred and is being amortized over the life of the bonds. In addition, approximately \$4.5 million of original issue premium is being amortized over the life of the bonds. All debt issuance costs are recorded in debt and lease obligations on the statements of financial position.

In connection with the issuance of these bonds, the University has agreed to certain covenants with which it must comply. The covenants provide that the University cannot incur additional long-term debt in any amount, unless (1) debt service requirements on all long-term debt during the fiscal year, plus the maximum annual debt service requirements on the proposed additional long-term debt is less than 10% of the University’s unrestricted operating revenues during the previous fiscal year, and (2) the University’s expendable resources are greater than 50% of all outstanding and proposed long-term debt; however, that such test shall not be required to be met if the additional long-term debt is being incurred to refund existing long-term debt and the maximum annual debt service requirements on the proposed long-term debt are less than or equal to the maximum annual debt service requirements on the existing long-term debt. In June 2019, the outstanding bonds were partially deceased in connection with the sale of the Tri Generation facility.

NOTE I - RETIREMENT PLANS AND OTHER POSTRETIREMENT BENEFIT OBLIGATION

The University participates in single-employer contributory retirement plans, which provide for the purchase of annuities and various mutual funds for academic, administrative, salaried, and other hourly employees. The employee is responsible for a 5% pretax contribution, while the University contributes up to 8% on behalf of the employee. The University annually funds the retirement costs under the plans, which amounted to \$5.6 million and \$5.2 million for the years ended June 30, 2024 and 2023, respectively.

The University provides certain health care benefits to certain retired employees. These postretirement benefits are unfunded and generally are based on employees' years of service and compensation levels. The University is required to make an accrual of the expected costs of these benefits over the period in which the employees render the service.

Duquesne University of the Holy Spirit

NOTES TO FINANCIAL STATEMENTS - CONTINUED

June 30, 2024 and 2023
(Dollars in thousands)

NOTE L - CONTINGENCIES

The University is a defendant in certain legal proceedings arising out of the normal conduct of its business. In the opinion of management, based upon discussion with counsel, the ultimate outcome of these matters will not have a material adverse effect on the financial position or activities of the University.

Under the terms of federal grants, periodic audits are required and certain costs may be questioned as not being appropriate expenditures under the terms of the grants. Such audits could lead to reimbursement to the grantor agencies. The University's management believes disallowances, if any, will not have a material effect on the University's financial position.

NOTE M - RELATED PARTY TRANSACTIONS

In the ordinary course of business, there are occasional contributions or pledges to the University made by members of the Board of Trustees, officers and/or key employees. There were no other material related party transactions in fiscal year 2024 or 2023, respectively.

NOTE N - SUBSEQUENT EVENTS

The University has evaluated subsequent events through October 11, 2024, the date the financial statements were issued.
