Biological Sciences Honors Thesis Mentor Agreement

I, __________________________________________________ ,

acknowledge that __________________________ desires to produce, before graduation, an Honors Thesis based on research conducted under my mentorship.

I commit to supervising the student in the required undergraduate research courses, BIOL 398/399, and to provide grades to the Biology Department at the end of the semester. I will apprise myself of the current Honors Program guidelines and agree to follow those guidelines, including deadlines articulated in the BIOL415H syllabus.

I will ensure that the studies described in the Honors Thesis are the sole work of the student and that the thesis is written in the student’s own words. I agree to take responsibility for mentoring the student through the production of the Honors Thesis. This includes working with the student to revise and improve their written Honors Thesis and the oral presentation of their Honors research.
