HealthShare
Anthony Pettit

Description: HealthShare is used to keep all of your medical information securely in one place, and only accessible by those that you give access to. It makes it much easier to have your medical information ready for all doctors who may need it, at a moments notice. It will have 3 distinct functions:

1 - Sending requests to medical facilities in order to receive your medical information

2 - Accepting or Denying requests from medical facilities and doctors who require your medical information

3 - Being able to view all information you have stored on HealthShare.
