PRE-Clinical Health Requirements (PCHR) – Duquesne University School of Pharmacy

The following health requirements are mandatory for all Duquesne School of Pharmacy students prior to any experiential/clinical education course at off-site facilities. Please see Duquesne University School of Pharmacy Pre-Clinical Health Requirements form for complete criteria. Failure to complete these health requirements will be cause for refusal at practice facilities which may impede your progress in the completion of your degree. Please follow your department guidelines for deadlines.

A. PROOF OF IMMUNIZATIONS – Obtain a copy of records from your MD office
   - MMR 2 doses, Meningitis (one MCV4 dose administered on or after the 16th birthday), Tdap, Hepatitis B 3 doses.
   - Either proof of 2 doses of Varivax vaccine (chickenpox) OR a positive immune *Varicella titer (blood test).
   - Seasonal Influenza vaccine (Due date will be determined by the department)

B. PROOF OF IMMUNE BLOOD TESTS – Obtain a copy of your lab results.
   - MMR titers – Measles(Rubeola) IgG, Mumps IgG, Rubella IgG
   - Hepatitis B Surface Antibody
   - Varicella Titer IgG (or proof of 2 doses of Varivax vaccine)

PLEASE UPLOAD ALL RESULTS, EVEN IF NON IMMUNE

C. BOOSTER DOSES IF TITER RESULTS ARE NEGATIVE
   - MMR booster if any of the MMR titers show “Non-immune” or “Equivocal” results.
   - Obtain a Hepatitis B immunization and repeat the Hepatitis B Surface Antibody blood test no sooner than 4-8 weeks later for non-reactive or equivocal results. If immunity is determined, no further action would be required. However, if the test indicates that immunity is still lacking, complete the remaining 2 injections of the Hepatitis B series followed by a final blood test 4-8 weeks after the last injection.
   - 2 doses of Varivax vaccine for a “Negative” or “Equivocal” Varicella result.

D. TUBERCULIN SKIN TEST – 2-step PPD (Mantoux)
   - Initial test must be a 2-step test – 2 separate PPD skin tests done 10—21 days apart. This will involve 4 office visits. The Quantiferon Gold is an acceptable alternative to the two step Tuberculosis skin test.
   - Tuberculosis screening is an annual requirement and subsequent yearly single step PPD skin tests are required. If more than 12 months have lapsed between screenings, the 2 step process must be repeated.

*In the event the PPD (Mantoux) is unavailable or the student has had a previous reaction to the skin test, the Quantiferon Gold blood test is an acceptable alternative, (Available at Duquesne University Health Services - fee $60)

E. PHYSICAL EXAM
   See “Duquesne University School of Pharmacy Pre-Clinical Health Requirements” form. Physical exam may be done at an MD office, Health Service, or local “walk-in” facilities.
