ADVANCING ETHICAL PRACTICE:
EXPLORING THE GRAY AREAS

2018 CAROL CARFANG NURSING & HEALTHCARE ETHICS CONFERENCE

FEBRUARY 28 – MARCH 2, 2018
HILTON CLEARWATER BEACH, CLEARWATER, FLORIDA
Thank you for joining us for the first biennial Carol Carfang Nursing & Healthcare Ethics Conference, sponsored by Duquesne University School of Nursing in Pittsburgh, Pennsylvania, with the generosity of alumna and benefactor Carol Carfang.

This exciting new forum brings to the forefront ethical dilemmas in healthcare, focusing on the gray areas where difficult questions arise and offering the opportunity for analysis and discussion.

To bring clarity to these complex ethical situations, we are pleased to have assembled a diverse group of leading ethicists, philosophers, nurses and other healthcare professionals to discuss contemporary ethical challenges.

We look forward to three days of thought-provoking speakers, panels and presentations, as well as cocktail receptions and other opportunities to meet, greet and share ideas.
Dear Conference Participants, Presenters and Sponsors,

We are delighted to welcome you to the first biennial Carol Carfang Nursing & Healthcare Ethics Conference. Over our next few days together in beautiful Clearwater, Florida, we will examine, reflect upon and confront the many difficult ethical and practical challenges that arise in healthcare today. Our presenters range from nurses to philosophers, physicians to clinical ethicists, and genetic counselors to health law and policy experts. Our conference program reflects the diversity and depth of these challenges across multiple areas of healthcare, as well as the need for collaboration across those areas in addressing them.

The School of Nursing at Duquesne is committed to interdisciplinary education, scholarship, and the value of the humanistic aspects and ethical underpinnings of nursing practice. At the heart of our approach to educating future nurses, advanced practice nurses and nurse researchers is the conviction that clinical work is a moral enterprise. Excellence in nursing practice requires not only acuity of mind and clinical competence, but also a firm moral identity and a responsiveness to the numerous ethical challenges arising from clinical care. At the Duquesne University School of Nursing, we integrate ethics education into all curricular levels—from our rigorous BSN program to our newly established PhD in Nursing Ethics program—with the expectation that our graduates will excel both as clinicians and as moral leaders in healthcare.

The Carfang Conference is a natural extension of this conviction. We thank you for participating in what we expect to be a vigorous and enlightening event, and we look forward to seeing you again in 2020 for the next Carol Carfang Nursing & Healthcare Ethics Conference.

Mary Ellen Glasgow, Dean and Professor, Chair
Eric Vogelstein, Assistant Professor, Co-Chair
Michael Deem, Assistant Professor, Co-Chair
DUQUESNE UNIVERSITY
Founded in 1878, Duquesne University is consistently ranked among the nation's top Catholic universities for its award-winning faculty and tradition of academic excellence. Duquesne, a campus of nearly 10,000 graduate and undergraduate students, has been nationally recognized for its academic programs, community service and commitment to sustainability. Duquesne's beautiful 60-acre hilltop campus is adjacent to Pittsburgh's downtown business district. Home to six Fortune 500 corporations, the city is a growing hub for technology, healthcare, financial services and start-ups.

DUQUESNE UNIVERSITY SCHOOL OF NURSING
For over 80 years, the School of Nursing has been recognized as a pioneer in nursing education and as one of the nation's foremost nursing schools. The school continues to be defined by its strategic leadership and innovative programming:
- First BSN program in Pennsylvania
- First online PhD in Nursing program in the U.S.
- First graduate online MSN in Forensic Nursing
- First BME/BSN dual degree program in the nation
- First online PhD in Nursing Ethics
Evidence-based nursing, critical thinking and intellectual curiosity go hand-in-hand with ethical practice, community service and a commitment to social justice. Our goal is to ensure that our students exemplify—in the best Duquesne tradition—the highest levels of competency, compassion and ethical behavior.

PHD IN NURSING ETHICS
Our new interdisciplinary research-focused PhD in Nursing Ethics, created in collaboration with Duquesne's Center for Healthcare Ethics, explores ethical challenges from educational, clinical practice and policy/leadership perspectives. This doctoral program teaches ethics related to organizations, leadership and research and offers a unique course in social justice. Students gain expertise in ethical dimensions of their practice and care of vulnerable populations in a way that is rare among nursing schools. As the healthcare environment continues to change, it is imperative that nurses have a critical voice in ethical issues.
ABOUT CAROL CARFANG
Carol received her BSN from Duquesne University in 1973 and an MSN from the University of Wisconsin. She is a Certified Pediatric Nurse Practitioner in Illinois and has over 30 years of clinical experience with pediatric and adolescent children. She previously worked as a clinical nurse at Rainbow Babies & Children's Hospital of Cleveland, Children's Memorial Hospital of Chicago and Humana HMO. Carol practiced several years as a Certified Pediatric Nurse Practitioner at Chicago's Grant Hospital's newborn nursery, inpatient pediatric unit and pediatric outpatient clinic. She is currently a school nurse in the Evanston, Ill. school district.

Carol's passion is advocating for children with disabilities. She served on the Auxiliary Board of the National Lekotek Center, an innovative organization that provides an array of services to improve the lives of children with special needs through the utilization of toys and play. She also supported a soccer program for children with special needs in the Evanston community.

Carol and her husband, Tony, who is also a Duquesne alumnus and a former Duquesne board member, are enthusiastic supporters of Duquesne and make frequent visits to campus. Carol is an active member of the Leadership Committee of the Duquesne University Chicago Alumni Chapter, where she and Tony initiated an endowed scholarship.

“We love coming back for homecoming and getting in touch with students,” she says. Carol also uses it as an opportunity to see what is happening in the School of Nursing. “I have been very impressed with the great leadership and innovative ideas coming from the school,” she states. “The nursing school has an excellent academic reputation, and has received numerous distinguished awards and high national rankings; they are at the forefront of nursing education.”

Recognizing the complex ethical challenges in the healthcare industry today, and in collaboration with Dean Mary Ellen Glasgow, Carol eagerly supported the idea of a progressive seminar focused on nursing and healthcare ethics. Together they formed the foundation for the Carol Carfang Nursing & Healthcare Ethics Conference.

Carol believes the timing is right to discuss ethics, and that nurses are the perfect audience. “Nurses are the ones at the bedside,” she remarks. “They are right there with patients day-to-day. They often confront ethical issues, yet nurses may be uncertain about the individual nurse’s role regarding ethical decision-making. Nurses today need to be leaders and this conference will empower nurses to advocate ethical care for their patients.”
MEET OUR DISTINGUISHED SPEAKERS

Our keynote speakers are on the forefront of ethical thinking at prestigious institutions across the country. They were carefully chosen for their experience and scholarship representing a wide range of topics in healthcare ethics.

AMY MARIE HADDAD, PHD, the Dr. C.C. and Mabel L. Criss Endowed Chair in the Health Sciences, directs the Center for Health Policy & Ethics and chairs the online graduate program in healthcare ethics at Creighton University where she has been engaged in higher education in the health sciences since 1979. She holds a BSN from Creighton University, an MSN from the University of Nebraska Medical Center and a PhD from the University of Nebraska at Lincoln. Her publications include: *Health Professional and Patient Interaction* (8th Ed.) with Drs. Ruth Purtilo and Regina Doherty (2014), *Case Studies in Pharmacy Ethics* (3rd Ed.) with Drs. Robert Veatch and E.J. Last (2017), and *Case Studies in Biomedical Ethics – Decision-Making, Principles, and Cases* (2nd Ed.) (2014) with Drs. Robert Veatch and Dan English. In 2001, she was selected for the Carnegie Scholars program of the Carnegie Center for the Advancement of the Scholarship of Teaching. She is President of the American Society of Bioethics and Humanities, the largest professional association in bioethics and health humanities in the United States.

BONNIE LEROY, MS, CGC, is a board-certified genetic counselor with over 25 years of experience in the clinical setting and 30 years serving in leadership positions in the profession. She also served as a past Editor of the *Journal of Genetic Counseling*. Professor LeRoy has been the director of the genetic counseling graduate program at the University of Minnesota since 1989 and a collaborator with the Center for Bioethics. Genetic counseling is a relatively new healthcare profession and much of Professor LeRoy’s interest has focused on the developing practice. She has been engaged in studies that better define a model of practice from which outcomes can be determined and measured. In addition, Professor LeRoy is interested in the clinical training of genetic counseling professionals. In collaboration with students in training, she has been involved with studies investigating a wide variety of issues that have an impact on training, and in turn, service provision. As part of her teaching, Professor LeRoy has had her genome sequenced and she will share that experience and the experiences of patients and families.
ALEX JOHN LONDON, PHD, is the Clara L. West Professor of Ethics and Philosophy and Director of the Center for Ethics and Policy at Carnegie Mellon University. An elected Fellow of the Hastings Center, London's work centers on the ethical and policy issues surrounding the development and deployment of novel technologies in medicine, biotechnology and artificial intelligence. His papers have appeared in Mind, Science, The Lancet, PLoS Medicine, Statistics In Medicine and The Hastings Center Report. He is also co-editor of Ethical Issues in Modern Medicine. Professor London has helped shape key ethical guidelines for oversight of research with human participants; he has served on the Working Group on the Revision of CIOMS 2002 International Ethical Guidelines for Biomedical Research Involving Human Subjects. He also was an expert commentator at three World Medical Association meetings during the revision of the 2013 Declaration of Helsinki. Since 2007, he has been a member of the ethics working group of the U.S. HIV Prevention Trials Network that drafted the HIV Prevention Trials Network Ethics Guidance for Research. He also participated in the Academy of Medicine's Committee on Clinical Trials. During a recent Ebola outbreak, he was appointed to the U.S. Health and Human Services Advisory Committee on Blood and Tissue Safety and Availability. He has been an expert ethics consultant with numerous national and international organizations including the National Institutes of Health, the World Health Organization, the World Medical Association and the World Bank.

ROBERT M. VEATCH, PHD, Professor of Medical Ethics, Emeritus, and former Director of the Kennedy Institute of Ethics at Georgetown University, remains at the Institute as Senior Research Scholar. He was also Professor in the Philosophy Department and held an appointment as adjunct professor in the Georgetown Department of Community and Family Medicine. He authored or edited 53 books. His current research is on the history of professional medical ethics. Since 1988, he has been a member of the Board of Directors of the Washington Regional Transplant Community and has served on the United Network for Organ Sharing committees of ethics, living donation, and vascular composite allografts of the face and hands. He has served as the President of the Board, Hospice Care of the District of Columbia, as a member of the editorial board of JAMA, and as a member of four National Institutes of Health data and safety monitoring boards. He has served as Chair of Georgetown's Institutional Review Board for social science research. He has consulted widely and has been an expert witness in over 30 legal cases including the Karen Quinlan (1975-76) and Baby K (1992) cases. His work has been recognized with the Lifetime Achievement Award of the American Society of Bioethics and the Humanities and the Henry Knowles Beecher Award for Lifetime Achievement of the Hastings Center, the National Book Award of the American Medical Writers Association, the Distinguished Achievement Award of the United Methodist Association, the Research Career Recognition Award, Georgetown University, and the Distinguished Service Award of St. George's University School of Medicine. Throughout his career he has been an advocate for the rights and welfare of patients as active decision-makers in medicine. He received a BS in Pharmacy from Purdue University (1961), an MS in Pharmacology, University of California Medical Center (1962), and a BD, MA and PhD (1970) concentrating in medical ethics from Harvard University. He has received honorary degrees from Creighton University and Union University.
