RSHS students will be allowed to take advantage of the P/N Grade Option for the Spring 2020 semester, in accordance with the policies below:

**Pre-Professional Phase Students and Undergraduates in the Biomedical Engineering program:** May elect to convert any course grade of D or above to P. However, pre-professional phase students are required to repeat any course in which a grade below C was earned, including University Core courses, regardless if it is converted to P. Undergraduates in the Biomedical Engineering program are required to repeat any math, science and engineering courses in which a grade below C was earned; they are not required to repeat University Core courses if a grade of D or better is earned. Grades of N (No-Pass) are not included in a student’s grade point average and must be repeated.

**Professional/Accredited Phase Students:** May elect to convert any course grade of C or above to P and any course grade of below C to N (No-Pass). Grades of N are not included in a student’s grade point average and must be repeated.

**Regarding program GPA calculations:** For all RSHS programs except Physician Assistant Studies, if a student elects to convert a course grade to P in either the pre-professional or professional phase, the original earned letter grade will not be included in a GPA calculation to determine academic standing such as Probation and Dismissal. In the Physician Assistant Studies program, if a student is in the accredited phase and elects to convert a course grade to P or N, the original earned letter grade will be calculated in the GPA to determine academic standing such as Probation and Dismissal. Students are encouraged to review policies and procedures for appealing academic dismissal, if applicable.

**For all students:** Grades of N are not included in a student’s grade point average and must be repeated if the course is required for the student’s program of study.
